# Water Protectors

ReSound Water Protectors are earmoulds specifically designed to protect the ear from water during activities such as swimming and surfing. They assist with the prevention of ear disease and infection, and reduce common irritations that are associated with water sports.

Many people suffer from common water related ear irritations, conditions such as Surfer's ear, Swimmer's ear and ear ache can be reduced by regularly using Water Protectors during water sports. Water Protectors are also useful for common conditions such as perforated eardrum, Grommets and Ventilations tubes. People with conditions such as these will most likely be advised by their doctor to keep their ears clean and dry while healing to avoid further complications and infection.

ReSound Water Protectors work to protect your ears against water and moisture during water sport activities. They come in a range of fun colours and are designed to include a safety cord to ensure they stay together and are not easily lost during water sports.

ReSound Swimmer Plug features removal cord. Available in a range of colours.
